Uses temporarily relieves common loneliness/depression symptoms, and contingent friendship needs:

- constant moral support (in all areas, but particularly confidence)
- receiving good musical and written pieces
- receiving good gifts
- in-house copyediting/writing service
- coworker mode offered 1-2 times a week
- sleepover (in the same apt)
- churchgoing company
- unprecedented feeling of security
- constantly wholesome friendship
- company in pretty much all activities one can think of

Warnings

Pride issues: Though generally kind and easy to hang around, certain matters charged with pride can critically damage your feelings and soul.

Solitude preference: Though Yvonne has yet to outrightly deny your presence, she is very vocal about her preference of being alone over everything. Unclear as to how to go about this besides never asking to hang out unless you are directly asked to.

Touch sensitivity: Yvonne is sensitive to touch. Exercise caution when seeking human temperature and touch.

Mute mode: You are quiet, she is quiet. She generally will not talk unless you make her to, and it will still be uncertain at these times if she wants to talk at these times. This can be quite taxing when traveling or on a date. Prepare a deck of index cards containing exciting questions.

Drug Facts (continued)

Multitude of communication channels: Though mostly condensed on iMessage, communication channels span over email, Slack, Facebook Messenger, YouTube, KakaoTalk, Google Hangout, Monday.com, and physical notes and may cause confusion.

Do not use

- if there are signs of solitude need
- at regular pace when with family
- excessively at work or other professional settings
